Vienna, January 28th 2016

Oregano Systems is an innovative and flexible design service provider for complex industrial embedded systems design. Oregano Systems is known for its world leading syn1588[®] clock synchronization products.

To increase the capacity of our software design team we are looking for a software engineer (mf).

Requirements

- design and support of our syn1588[®] software
- software development using C/C++
- software development on Windows and Linux
- hardware based software development
- English fluent in spoken and written required, German welcomed but not required
- university degree

We do not expect miracles but spirit and dedication.

Oregano Systems does not care about your age/gender/race/religion/mother tongue. The only thing that counts is skills, communication and team spirit. We offer a full time position in our team known for its familiar atmosphere.

Please send your application with the usual documents via email to cadek@oregano.at. Your application will be treated confidentially.
